

### WELCOME PACKET

# OLDER-ADULT WELLNESS

Your 12-week welcome packet, built for function, balance, and feeling better moving through your day.

---

## Welcome

Welcome to Echelon. These 12 weeks are not built around aesthetics or maximum intensity, they are built around how you feel moving through your day, your balance, and your independence. Every exercise choice keeps falls-prevention and joint-friendliness in mind first.

## Your Program At a Glance

**Format:** 3 lifting and functional-strength days a week, plus daily mobility and 2 balance-focused sessions. Recoverability, not stimulus, sets the pace here.

| Phase             | Weeks | What's Happening                                                    |
|-------------------|-------|---------------------------------------------------------------------|
| 1: Foundation     | 1-4   | Movement confidence, a balance baseline, very conservative loading. |
| 2: Build          | 5-8   | Gradual load increases, longer balance holds.                       |
| 3: Sustain        | 9-11  | Consolidating gains, light functional carries introduced.           |
| Deload / Reassess | 12    | Retest balance and functional benchmarks, celebrate the progress.   |

## How We Work Together

- Your day-by-day training lives in Today's Work inside your Member Portal, log in anytime to see what's next, and mark it complete once you finish.
- Check in honestly. Tell your coach what actually happened, not what you think we want to hear, an honest "I missed two days" helps us adjust; a false "everything's perfect" just delays the fix.
- If something hurts (not just the normal soreness of training), stop, message your coach before your next session, and see a clinician if it does not resolve. Never push through real pain.
- Your plan will change. What you start Week 1 with is not what you will be doing Week 8, that is not the plan failing, that is the plan working.

## **What Makes Older-Adult Wellness Different**

Older-Adult Wellness is built around function, balance, and how you feel moving through your day, not aesthetics or maximum intensity. Falls-prevention and independence sit behind every exercise choice, and recoverability, not how hard we can push you, is what sets the pace.

## **The Echelon Standard**

Every Echelon program is built on the same four things: Structure, a proven system that removes the guesswork; Accountability, coaching and check-ins that keep momentum moving; Commitment, progress earned by returning to the standard, especially when motivation is low; and Faith, strength that starts internally, character and purpose driving everything else. The exercises in front of you are specific to your goal. The standard behind them is the same for every person who trains with us.

## **Getting In Touch**

Message your coach anytime through the Member Portal, that is the fastest way to reach us during your program. For anything else, reach Echelon Fitness Collective at [echelonfitness.co](https://echelonfitness.co).
