

VL BODY LAB

An athletic strength and conditioning format with a sharp, safe class flow.

ECHELON FITNESS
COLLECTIVE

THE STANDARD

Performance-driven group training that
never sacrifices safety
or coaching quality for intensity.

BODY LAB

01 / PROGRAM IDENTITY

VL BODY LAB

VL Body Lab is Echelon's athletic strength and conditioning class: station-based, performance-focused training delivered with the same coaching standard as every other Echelon offering.

Intensity is never the excuse for sloppy coaching. A class can be hard and still be sharp, safe, and well-run every single time.

WHAT MEMBERS RECEIVE

- **Station-based strength and conditioning work** coached in real time, not left to run itself.
- **A clear performance focus for every class**, not a random workout for the sake of one.
- **Safe progressions and regressions** for every skill level in the room.
- **A class that respects intensity** without ever sacrificing form for it.

COACHING BOUNDARIES

Screen for injury history before a member's first class. Regress before adding load or speed, and never let competitiveness override safe technique. Refer out for anything beyond a fitness training scope.

02 / THE CLASS RHYTHM

SHARP EVERY TIME

A well-run VL Body Lab class is built before members ever walk in the door.

PHASE	COACH ACTION
Before Class	Build the stations, coach the intent, and prepare regressions before members arrive.
At Check-In	Confirm readiness and explain the day's performance focus.
During Class	Coach quality, effort, and safe progressions -- not just speed.
After Class	Post the next class invitation and create a follow-up task for prospects.

03 / DELIVERY SEQUENCE

RUNNING THE CLASS

Complete these in order, every class. Create a Coach Command task for any prospect who needs follow-up.

STEP 1 BUILD THE STATIONS

Set up every station and equipment need before members arrive.

Prepare a regression and a progression for each movement in advance.

Confirm the day's performance focus and how you will coach it.

STEP 2 BRIEF THE ROOM

Confirm readiness and flag any injuries or limitations at check-in.

Explain the day's focus and what quality looks like at each station.

Set expectations for pace before the clock starts.

STEP 3 COACH THE WORK

Move through the room -- do not coach from one spot.

Correct form before adding intensity, every time.

Call out effort and technique by name, not just time or reps.

STEP 4 CLOSE & CONVERT

Post the next class invitation before members leave.

Personally invite any first-time guest to their next session.

Create a follow-up task for any prospect who has not committed.

04 / COPY AND SEND

MEMBER COMMUNICATION STARTERS

FIRST-TIME ATHLETE WELCOME

Welcome to VL Body Lab. Every station has a scaled option, so match the intent of the movement before you chase speed or load. Let me know before we start if there is anything I should be mindful of coaching you through.

POST-CLASS PERFORMANCE NOTE

Strong work today, especially on [specific detail]. Recover well tonight and I will see you at the next class on [day]. Reply here if anything felt off so I can adjust for next time.

PROSPECT FOLLOW-UP

It was great having you in VL Body Lab. If you want to make this a regular part of your training, here is how to get on the schedule: [next step]. Happy to answer any questions before you decide.

Athletic training earns its intensity through coaching, not in spite of it. That is the difference between a hard class and a good one.
